

# Lecture 1: Introduction / Overview

## Modeling Social Data, Spring 2019

### Columbia University

Jake Hofman

January 25, 2019

This is just so that you have an example of what the file structure should look like for submitted notes.

Notice that I've only added the main `template.tex` file and my `jmh2045.tex` file, along with any figures included in the document and the file rendered pdf, to the repository.

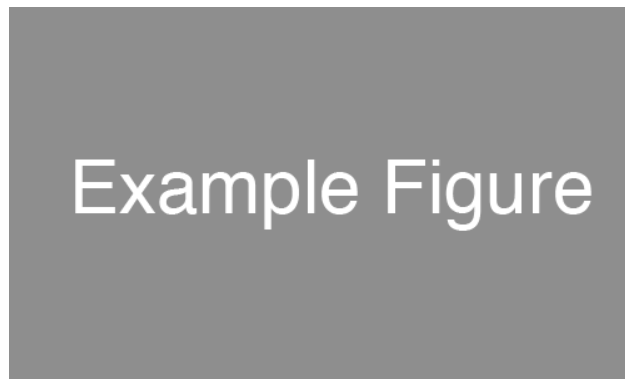

Figure 1: This is how to include a figure. As long as you use `pdflatex` most file types (e.g., jpg, png, pdf) should work.
